

# DYES PIGMENTI

Dyes are organic pigments dissolved in solvent; their main feature is to be transparent and extremely bright. Their ideal application is on plated surfaces which highlight the pigments' brightness as to obtain an effect similar to a plating treatment but with an infinite range of colors usually obtained solely through a plating process.

Dyes are mixed with paint, either cathoretic, spray or post-immersion, allowing a wide range of applications going from the Jewelry and Fashion sectors and whenever the esthetics is an added value.

I coloranti sono pigmenti organici sciolti in solvente; la loro principale caratteristica è di essere trasparenti ed estremamente brillanti. Hanno applicazione ideale su superfici galvanizzate che esaltano la brillantezza dei pigmenti, così da ottenere un effetto simile a un trattamento galvanico ma con una gamma di infiniti colori normalmente ottenibili con la sola galvanica.

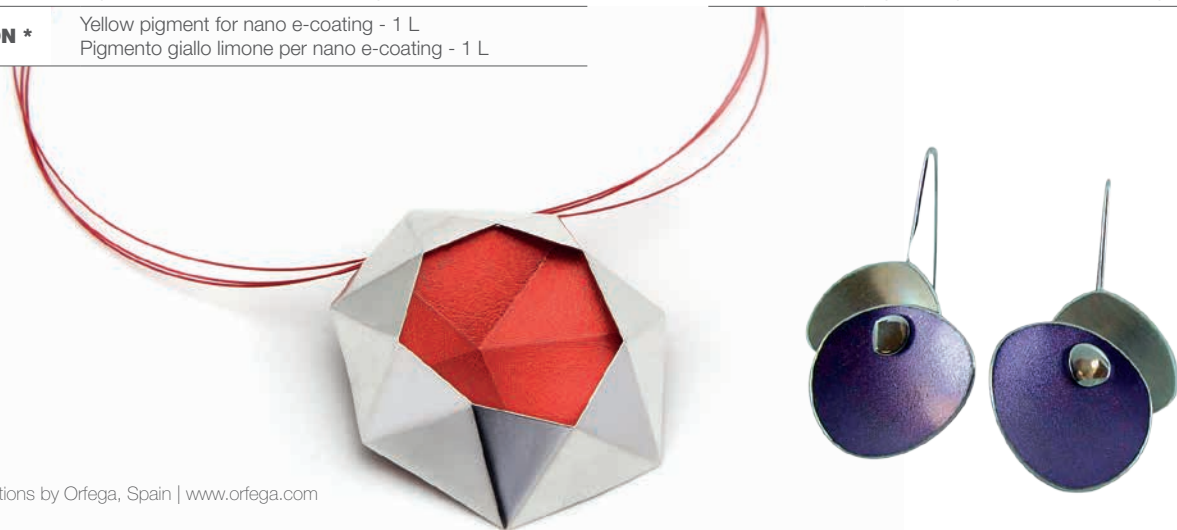

I coloranti vengono mescolati alle vernici, siano esse cataforetiche, a spruzzo o a immersione, consentendo così un vastissimo range di applicazioni nei settori del Jewelry, Fashion ma anche su qualsiasi oggetto dove l'aspetto estetico sia un valore aggiunto.

Codes:

<b>K-BLACK *</b>	Black pigment for nano e-coating - 1 L Pigmento nero per nano e-coating - 1 L
<b>K-BLACKX *</b>	Extra black pigment for nano e-coating - 1 L Vernice concentrata nera extra per e-coating - 1 L
<b>K-BLU *</b>	Blue pigment for nano e-coating - 1 L Pigmento blu per nano e-coating - 1 L
<b>K BROWN *</b>	Brown pigment for nano e-coating - 1 L Pigmento marrone per nano e-coating - 1 L
<b>K-EMERALD *</b>	Emerald green pigment for nano e-coating - 1 L Pigmento verde smeraldo per nano e-coating - 1 L
<b>K-GREEN *</b>	Green pigment for nano e-coating - 1 L Pigmento verde per nano e-coating - 1 L
<b>K-LEMON *</b>	Yellow pigment for nano e-coating - 1 L Pigmento giallo limone per nano e-coating - 1 L

<b>K-ORANGE *</b>	Orange pigment for nano e-coating - 1 L Pigmento arancione per nano e-coating - 1 L
<b>K-PINK *</b>	Pink pigment for nano e-coating - 1 L Pigmento rosa per nano e-coating - 1 L
<b>K-RED *</b>	Red pigment for nano e-coating - 1 L Pigmento rosso per nano e-coating - 1 L
<b>K-TRQ *</b>	Turquoise pigment for nano e-coating - 1 L Pigmento turchese per nano e-coating - 1 L
<b>K-VIOLET *</b>	Violet pigment for nano e-coating - 1 L Pigmento viola per nano e-coating - 1 L
<b>K-YELLOW *</b>	Yellow pigment for nano e-coating - 1 L Pigmento giallo per nano e-coating - 1 L
