VEGA BRONZE
WHITE BRONZE ELECTROLYTE Pb FREE

Perfect substitute for Nickel Process.

Vega Bronze enhances hardness and oxidation resistance, typically used over acid copper as a technical layer, or economical white decorative finishing for nickel-free fashion specifications.

PLUS POINTS:

1 FREE OF STAINING

Our technical expertise combined with outperforming process components gave birth to this innovative white bronze coating. Capable of sustaining longer working times and thicker layers than usually possible for a bronze bath, it's the optimal intermediate substrate for decorative finishings and the perfect final layer for economic coatings, guaranteeing an always stain-free surface.

2 BRIGHTER

clients evaluate it considerably whiter and more shining than both previous LEGOR formulations and other solutions they have tested in the market.

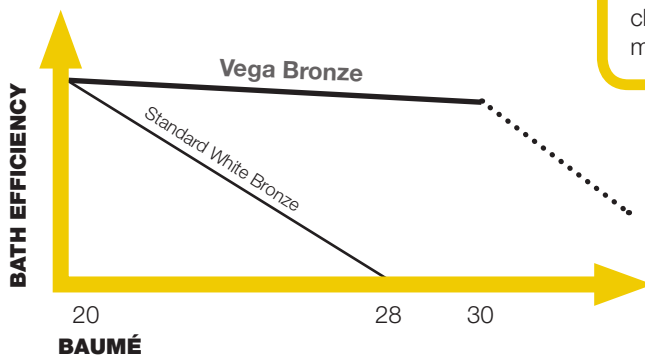

Standard White Bronze

Vega Bronze

3 LONGLASTING

with the longest bath-life timing, when compared to the traditional white bronze formulas in the market.

4 EASY-TO-USE

and to maintain: higher tolerances than the optimum values that every chemical species must meet.
